

# 2022 SAM Champs RC Schedule

The 2022 SAM champs planning is in full swing. We hope as any of you as possible will attend.

We have made a few small rule changes to help increase participation in all RC events. We hope to increase the number of participants and flights by allowing more than one contestant to fly the same plane in an event. If more than one contestant maxed out with the same plane only one contestant would fly in the fly off. This would allow two good friends or a father and son team to participate in more events.

The second special rule is to allow smaller LER planes to fly with the larger planes. Example an A sized plane could fly in the B and C class events. The smaller sized planes

would have to conform to the rules of the B or C events they flew in. This would allow a contestant to fly one or two planes in all the championship events.

The overall glow and Ignition championship will be by the SAM rule book, The five Ignition championship events are class ABC LMR, Pure Antique, Ignition Texaco. The six Glow championship events are class ABC, LMR, 1/2 A Texaco, Antique, and Glow Texaco. The five electric Championship events are Electric LMR, Electric Texaco, Spirit of SAM, Electric Wakefield, Speed 400.

To all of you who plan to attend it would be very helpful if you registered as soon as possible. This helps the planners when they are ordering plaques, food and hats.

We look forward to seeing you at Henderson for a week of fun flying. The schedule for RC flying and special rules are listed below.

## Monday, October 17

Pure Antique ( , pre 1939 designs)
