Report No. 120
Cleveland Cloudster 600
January 13, 2021

I called Larry Davidson a couple of days ago and asked him how many coats of clear dope he puts on Polyspan. He said generally six (6) coats. As of noon today I have brushed on 2 coats of straight PTI nitrate clear dope and one coat of 50% dope/50% thinner as shown below. Since I am double covering silk over Polyspan, I am going to brush on one more coat of 50% dope/50% thinner before I start the second covering of silk.....Tandy
