To all of my many modeling friends,

Yesterday afternoon Fed-Ex delivered an cardboard envelope with two packages of Alliance's red rubber bands shown below that Laura Bruce promptly sent me almost overnight, no charge! I tried six bands each for both sizes on the Fubar's 9.36" wing chord. The 6" X 1/8" worked out perfect for the wing attachment to the fuselage.

If you guys ever need any of these red rubber bands, I strongly suggest you order them from Alliance Rubber Company.

I received the message below from Laura Bruce this morning and I thought you would be interested in how they measure the length of rubber bands.....Tandy

Hello Mr. Walker

I attached a picture of how we measure the flat length of our bands. The 6" in bands will have 3/8" tolerance on either side. I'm glad they worked for your process.

Have a great day.

**Laura Bruce**
