Report No. 10

AEROTAN BIPLANE

November 12, 2022

Yesterday my friend L.A. Johnston provided me with another biplane design rule. The stab should be placed at the center of the wing's gap. Well guess what? Without realizing it, the stab was accidentally located only slightly off center by $(3.65 - 3.60)/2 = 0.025$ ". Thank you L. A. for helping me with biplane design rules.....Tandy
