Subject: 77 Covering the Top of the Bomber Wing

Mid morning, my wife Sue took this picture as I was rolling over and sealing the Ultracote Lite covering edge of the top of the left wing tip panel. With this 96" one-piece wing, I have to be very careful not to jam it into the ceiling, wall, table, or anything else as I rotate the structure around to position the wing for covering. It is amazing how many times you actually reposition a wing while you are covering it. I hope to finish covering the wing today.....Tandy
