Subject: 10 Speed 400 Cloudster - Stab Patterns

Speed 400 Cloudster Project

The Jim Adams plan of the Cloudster does not show the stab ribs as does the Cleveland plan so I went to the copy center today and had a copy of the Cleveland plan made reduced by the 0.923 scale factor. This provided the stab rib patterns, which I cut out as shown below.

Since I had the reduced copy anyway, I also cut out the stab's tip and trailing edge patterns (S1 through S4) as shown below. Then I realized that I goofed on parts S1 and S2 as they were not for R/C with the stab and elevator division. So I cut out as second set of S1 and S2 modified from the other side of the plan, which does show the R/C division. Not a lot of progress today I know, but some. The key to model building is to something every day.....Tandy
