**Subject:** 21 Speed 400 Cloudster - Hobby Lobby First Order Arrival

### *Speed 400 Cloudster Project*

I received my first order from Hobby Lobby on Tuesday before Thanksgiving. However, I did not get to open it until this evening. Shown in the picture below are: (1) four sets of red polarized connectors, (2) a JESI 12 Amp ESC, and (3) two motor mount wafers. I am not sure why all of the connectors are red. Seems like half of them should have been black? Also, I probably will not use the two motor mount wafers now that I have a motor mount built.

Also shown in the picture below are: (1) two Pro Lite 1350 mAh 7.4 volt battery packs, (2) two 6 volt Speed 400 motors, and (3) 1-3/16" spinner/adaptor. The only things I seem to be missing are the two props (coming in a second order) and black connectors, which I will have to order. I may order some different type connectors as I am not sure I even like these new ones!

The picture below shows a trial fit of the 1-3/16" spinner/adaptor mounted on the Speed 400 motor and placed on the Cloudster plans, which shows a good fit.....Tandy
