**Subject:** 53 Second Cloudster - Windshield and Side Windows Glued.

*Second Cloudster 300*

This afternoon I removed the glued windshield taping and clamping. I cut out both side windows and glued them on as well as shown below.

Tomorrow I will tape the windshield and side windows with 3/32" red striping tape, which will finish up the window installation. Then I can get on with the final assembly of the model.....Tandy
