Subject: 24 J-3 Cub Stab Trial Fit

After we got home from church this morning, I unpinned the stab and removed it from the plans. Since the stab and elevator are now one piece, it would not fit into the fuselage stab slot, so I had to cut out a section of the tail post in order to slide the stab into place. The picture below shows the trial fit of the stab and rudder on the aft fuselage.

Here is another shot from a different angle.....Tandy
