Subject: 49 J-3 Cub Wing Storage

I gave the fuselage structure its first coat of dope this evening. I will sand it and dope it two more times before I start to cover the fuselage frame work with tissue. I will store the covered wings while I am covering the fuselage and I do not want them to warp. So I came up with the idea of wrapping and taping the two wing panels together, bottom to bottom, tightly with bond paper as shown below to prevent them from warping.....Tandy
