Scaled Up 1/2A Fubar 375

August 24, 2019

I didn't feel too well when I got up so I pretty much did nothing this morning. However after lunch I began to feeling some better. So I started covering the elevator and managed to finish both halves this afternoon. The slots were cut out and the hinges installed, but not glued in yet. Then the hinge pins were used to attach the elevator halves to the stab so I could take this picture to show you.....Tandy
