**Subject:** 49 Cleveland 80" Playboy Senior - Verifying the Dihedral Angle

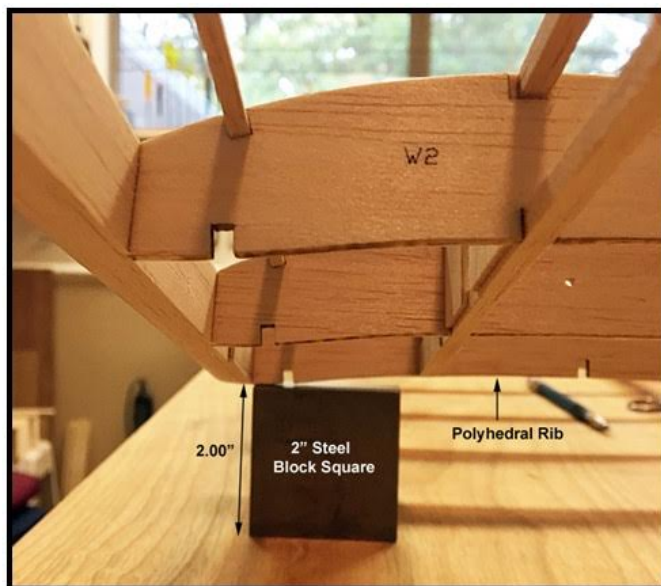

*Cleveland 80" Playboy Senior*

*June 15, 2017*

The plan insert below shows the inner panel vertical rise is 2.00" on each side.

Just as a follow up to last night's Report No. 48, the wing was unpinned and removed from its jig this morning. Then a 2" steel block square was placed under the LE of the polyhedral rib as shown below.

Steel lock squares were placed on each side of the wing as shown below to check the dihedral angle. The bottoms of the two temporary W1 dihedral ribs made contact with the table which verified the dihedral angle was correct.....Tandy
