**Subject:** 49 Rocketeer A - Wing Planking (Part 2)

Web Site: [Tandy's Model Aircraft](#)

*Rocketeer A*

*January 28, 2015*

After planking three bays on the bottom of the wing's center section with 1/20" sheet balsa, I glued a label with my name, address, and date glued on the top of the center section planking as shown below. This is like a "Time Capsule". I have it in either in the planked wing center sections or pylons of all of my models.

It took me most of the rest of the afternoon cutting, fitting, and gluing in all eight bays of the bottom center section as shown below. Notice that the forward 3/32" X 3/16" bottom spar has now been added. Again, at this point I stopped for the day. I will wait until tomorrow to work on the difficult planking of the top of the two wing tip panels.....  
Tandy
